THE IMPORTANCE OF STUDY SKILLS

Studying is one of the elusive elements with which many students struggle. Many students realize they need to study because it naturally fits that if one is taking classes, then one must study, right?

Remember these tips for making the most out of your study time:

- Make a study schedule that works with your own personal schedule - include work and family time when you are finding time to study
- Communicate with those in your home that your study time is important
- Choose a place to study that is quiet, has good light, and is convenient to place all books, pens, paper, etc.
- Remember - it is much better to study for 20 min - 30 min a few times a week, rather than trying to study for a much longer time but only once a week
- Bottom line: any study is better than no study.
