

APRIL 2021, PART 2

ATTENTION STUDENTS!

MICROSOFT POWERPOINT

Microsoft PowerPoint is an in-demand program used to assist in working with and presentation of information and digital slides, especially when presenting to a group of people.

PowerPoint was released in April 1987 and was originally for the Mac computer operating system (OS); 3 months later Microsoft was able to acquire PowerPoint.

This program is excellent and very easy to use for the personal user and the professional presenter.

Our Beginner's presentation will focus on the bare bones of the program just to get the very beginner used to the software and what can be done with a basic understanding.

SATURDAY 10 - 2

CURRENTLY FOR: age 60+, if you have 2 qualifying medical conditions, work in healthcare, education, grocery, or food processing.

PowerPoint can be used for several uses from personal to business: having your own personal job experience as a presentation, a group presentation for a college class, a business presentation about current and future goals of a business - all these are possible with the same program: PowerPoint.

With many beginning and advanced tutorials available online to learn PowerPoint; it has become one of the largest and most used presentation formats.

Please join us for our upcoming Zoom classes on PowerPoint. These are basic classes intended for a person unfamiliar with PowerPoint, but can be helpful in getting started with the basics.
